

01.4 Detailed PRISMA-ScR Flow

Record-level counts at each screening stage with paper-level exclusion reason breakdown

This document accompanies the abridged PRISMA-ScR flow diagram in the main paper (Figure 2) and provides record-level counts at each screening stage, with a complete breakdown of exclusion codes.

Reporting follows the PRISMA-ScR extension for scoping reviews (Tricco et al., 2018). All exclusion codes (EXCL-*) reflect the primary exclusion rule applied per the A Safe Bet screening protocol; full code definitions are provided in 01.3.

Identification and screening flow

Table 01.4.1

Records at Each PRISMA-ScR Stage

Stage	n	Note
Records identified from literature searches	1,876	Three primary databases (MEDLINE, PsycINFO, Web of Science) plus citation chasing
Records flagged as review references (parallel track)	88	Cited-only references from review papers; not independently screened
Records forwarded to title and abstract screening	1,788	1,876 minus 88 review references
Records excluded at title and abstract	1,340	Breakdown by exclusion code in Table 01.4.2
Records assessed at full text	448	1,788 minus 1,340
Records excluded at full text	198	Breakdown by exclusion code in Table 01.4.3
Studies included in taxonomy	250	250 unique papers, 267 studies, 410 extraction records (see Table 01.4.4)

Note. Records flagged as review references followed a parallel track: they were seeded as contextual bibliography entries and were not independently screened at title and abstract or at full text.

Title and abstract exclusion codes

Table 01.4.2

Detailed Breakdown of Records Excluded at Title and Abstract (n = 1,340)

Code	Description	n
EXCL-PUBTYPE-OPINION	Opinion or commentary	106
EXCL-PUBTYPE-PROTOCOL	Registered protocol only	29
EXCL-PUBTYPE-DISSERT	Dissertation or thesis	27
EXCL-PUBTYPE-BOOK	Book chapter	20
EXCL-PUBTYPE-UNAVAILABLE	Full text unavailable	13
EXCL-PUBTYPE-CONF	Conference abstract only	9
PUBTYPE subtotal		204
EXCL-LANG	Non-English language	35
LANG subtotal		35
EXCL-TOPIC-OTHADD	Other addiction, non-gambling	284
EXCL-TOPIC-OFFTOPIC	Off-topic, no RG relevance	267

Code	Description	n
EXCL-TOPIC-THIRDPARTY	Third-party or family focus	57
EXCL-TOPIC-MH	Mental health, not gambling-specific	56
EXCL-TOPIC-FINANCE	Financial or economic focus	19
EXCL-TOPIC-PHARM	Pharmacological intervention	17
EXCL-TOPIC-NONHUMAN	Non-human sample	15
EXCL-TOPIC-TECH	Technology, not RG tool	15
TOPIC subtotal		730
EXCL-CONTEXT-GEO-NONWEST	Non-Western jurisdiction	41
EXCL-CONTEXT-COVID	COVID-19 context only	36
EXCL-CONTEXT-GEO-UNIQUE	Geographically unique context	7
CONTEXT subtotal		84
EXCL-POP-SUBGROUP	Specific population subgroup	33
EXCL-POP-YOUTH	Youth or minors	13
POP subtotal		46
EXCL-REL-DESC	Descriptive, no tool focus	179
EXCL-REL-MECH	Mechanism not evaluable	37
EXCL-REL-METHOD	Methodological exclusion	25
REL subtotal		241
Total		1,340

Note. Codes are grouped by top-level reason: PUBTYPE = publication type ineligible; LANG = language not English; TOPIC = topic outside scope; CONTEXT = context outside scope; POP = population outside scope; REL = relevance (descriptive, mechanism, or methodological without RG tool evaluation). RG = responsible gambling.

Full-text exclusion codes

Table 01.4.3

Detailed Breakdown of Records Excluded at Full Text (n = 198)

Code	Description	n
EXCL-REL-DESC	Descriptive only; no extractable RG data	115
EXCL-REL-MECH	Mechanism not independently evaluable	40
EXCL-REL-METHOD	Insufficient detail for 45-field extraction	40
EXCL-TOPIC-THIRDPARTY	Third-party or family focus	2
EXCL-POP-SUBGROUP	Specific population subgroup	1
Total		198

Note. Codes EXCL-REL-DESC, EXCL-REL-MECH, and EXCL-REL-METHOD may be applied at either title and abstract or full text; counts above reflect the actual stage recorded in final_decision. Two codes formally labelled as title and abstract exclusions in 01.3 (EXCL-TOPIC-THIRDPARTY and EXCL-POP-SUBGROUP) were applied at full text for a small number of records (n = 3 in total).

Inclusion breakdown**Table 01.4.4***Included Papers, Studies, and Extraction Records by Primary Study Type*

Primary category	Description	Papers	% of 250
EXP	Experimental and quasi-experimental effectiveness trials	100	40.0
OBS	Observational quantitative (reach and uptake)	112	44.8
QUAL	Qualitative (reach, experience, implementation)	24	9.6
POL	Policy analysis and implementation reports	14	5.6
Total		250	100.0

Note. Counts at the paper level. The 250 included papers contributed 267 studies and 410 extraction records: 12 papers contributed multiple distinct studies, yielding 17 additional studies beyond the 250 unique papers; some papers contributed multiple distinct tool extractions, yielding the larger 410 extraction record total. All studies within a paper share the same primary category.

Note. Search strategy and database details are provided in 01.1; full eligibility criteria definitions in 01.2; complete exclusion code definitions in 01.3; record-level screening data in 01.5. RG = responsible gambling; PRISMA-ScR = Preferred Reporting Items for Systematic Reviews and Meta-Analyses extension for Scoping Reviews. Reporting follows the PRISMA-ScR extension for scoping reviews (Tricco et al., 2018).
